

Open up a whole  
new world...

*Imagine opening up your home and smelling the sweet scent of surrounding flora, or staring at the stars on a warm summer's evening. Nothing quite transforms a dull room into a warm, ambient living area like a modern patio or stylish French door*

# ...of uninterrupted views and natural light

Parallel sliding, easy glide system

Smooth in their operation, our patio doors are purposely designed and built for ease of use.

# Patio

**H**igh performance, secure and undoubtedly stylish. Slide open one of our patio doors and you'll appreciate the difference of a door with a host of inherent features designed to offer you increased levels of comfort and home security.

Besides the obvious advantages of being virtually maintenance free, the multi-chambered PVCu frame is impact resistant and, together with the doors integral weather and draught proofing seals and toughened double glazed units, forms an effective thermal barrier to keep you warmer when the climate outside is colder.

whiter than white or beautiful woodgrain finishes

## Patio door popular configuration options

# French

There's no disputing the aesthetic value of French doors. Their design offers a stylish alternative to patio doors with the doors opening inward or outward, depending on your choice, instead of sliding as with the patio design. But, just like the patio design, French doors give you greater access and allow more light to enter your living areas.

They are built to the same specification as our residential PVCu doors with multi-point locking fitted as standard and toughened safety glass installed in the double glazed unit for your personal safety. Equally adept at protecting your property from the wind and the rain, you'll find that a French door is a welcome addition to any home.

Choice of beading

- Hardwearing PVCu frames
- Strong and secure
- Weather resistant
- Very low maintenance
- Guaranteed to last

Building regulations  
Document L\*

Used with the correct glazing specifications, PROFILE 22 windows meet the improved energy efficiency requirements of the government's new Buildings Regulations Document L\*.

## A thermally efficient entrance

The multi-chambered construction of the high impact PVCu frame is not only strong but also acts as an effective thermal barrier to reduce the risk of condensation and lessen the heat lost from your home.

## French door popular configuration options

The best windows, doors and conservatories are made from
